PROJECTS

Data Leak Detection Tool

Dec 2023

Tools : Python, Regex, File System Operations, Git.

- Built a Python tool to detect sensitive data leaks (passwords, API keys, personal info) in local files and emails using regex.
- Enhanced file system security by identifying vulnerabilities and preventing unauthorized data exposure

Circular DNA Prediction Tool

Sep 2025

Tools: Python, Streamlit, Biopython, Matplotlib, FPDF

- Predicted circular DNA structures from FASTA sequences using Biopython.
- Detected repeats, ORFs, and key genomic elements like TATA box and polyA signal.
- Visualized circular genomes with interactive plots and generated PDF reports.
- Deployed as a user-friendly Streamlit web app for researchers.
